

Cloud & DevOps Security

Summit & Training 2019

November 4-11

#CloudDevOpsSummit @SANSDevSecOps

WELCOME

GENERAL INFORMATION

Venue

Renaissance Denver Stapleton Hotel
3801 Quebec Street | Denver, CO 80207
303-399-7500

Event Check-In

Colorado Ballroom Foyer

Wed, November 6. 7:00am – 9:00am

Registration Support

Boulder Creek

Wed, November 6 – Mon, November 11. 9:00am – 5:00pm

Course Breaks

Morning Break 10:30am – 10:50am

Lunch (on your own). 12:15pm – 1:30pm

Afternoon Break. 3:00pm – 3:20pm

CLASS INFORMATION

All courses will run 9:00am – 5:00pm (unless noted)

SEC540 Cloud Security and DevOps Automation

Instructors: Brandon Evans, Eric Johnson. Colorado Ballroom B
Extended Hours: 5:00pm - 7:00pm (Course days 1-4)

SEC542 Web App Penetration Testing & Ethical Hacking

Instructor: Serge Borso. Big Thompson

SEC545 Cloud Security Architecture and Operations

Instructor: Kenneth G. Hartman Colorado Ballroom A

MGT516 Managing Security Vulnerabilities: Enterprise and Cloud

Instructors: David Hazar, Jonathan Risto Clear Creek

DEV522 Defending Web Applications Security Essentials

Instructor: Jason Lam Platte River

BONUS SESSIONS

SANS@NIGHT:

Terraforming Azure: Not as Difficult as Planets

Speaker: David Hazar

Wed, November 6 | 7:15pm – 8:15pm | Colorado Ballroom A

Automating infrastructure in the cloud is becoming easier all the time. There are many ways of automating and managing infrastructure in Azure. In this talk, we will take a look at Terraform by HashiCorp and see how it compares with other available alternatives. We will explore some of the features that set it apart from other options, but also some of the challenges that users might face. Finally, we will step through some actual Terraform code and walk through the process of importing existing resources.

In the process, we will learn some basics about Azure including resource groups, service principals, and virtual networks. Join me and see some of the new additions to SEC540: Cloud Security and DevOps Automation.

SANS@NIGHT:

Manage Vulnerabilities Like a Pro: How to Take Your Vulnerability Management Program to the Next Level

Speaker: Serge Borso

Fri, November 8 | 7:15pm – 8:15pm | Colorado Ballroom A

At an organizational level, we all have assets and these assets all have vulnerabilities. Most of us have a patching program. Some of us have exception policies. A few of us have automated the entire process, but almost none of us think there isn't room for improvement in the program as a whole. Join this session to learn how to take your current program to that next level and what it takes to own the vulnerability management cycle in your own organization, VPC, and CI/CD pipeline.

Interested in adding a GIAC Certification or an OnDemand Bundle?

To receive the discounted rate, you must sign up before Monday, November 18th at 8:00pm EDT

Add to your order via your Portal Account: www.sans.org/account
